Prevention for dew condensation during winter.

ECO HEATER installed on windowsill blocks cold air which helps prevent mold and mildew build up.

Easy to Install & Easy to Operate

No need for inconvenient operation procedures:
Simply connect to the power supply socket, turn-on the switch and it's ready to use!

Does not affect your house interior.

It does not affect your interior, simply place it below your window because of its simple design it is not offensive to the eyes.

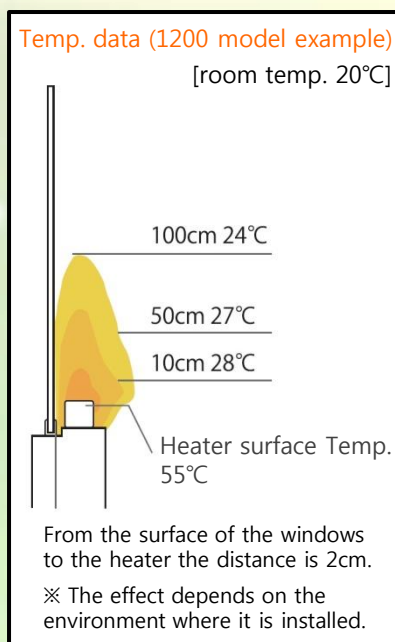

Even room temperature is down by 2°C ECO-HEATER maintains a comfortable environment.

※ The effect depends on the room condition.

Quiet & Safe

Eco Heater is a safe and simple power saving heating aid. It is light, convenient, handy and easy to install. By installing bimetal, temperature can be limited by simply turning the switch ON/OFF preventing over heating. Safe to install on windows using curtains, etc. And will not cause fire.

In case your feet feel cold use the Eco Heater under your office tables, toilet, and any empty space, it is very effective. Maintain comfortable indoor temperature without making a sound. Safe and friendly heater aid even to infants, elderly and pets.

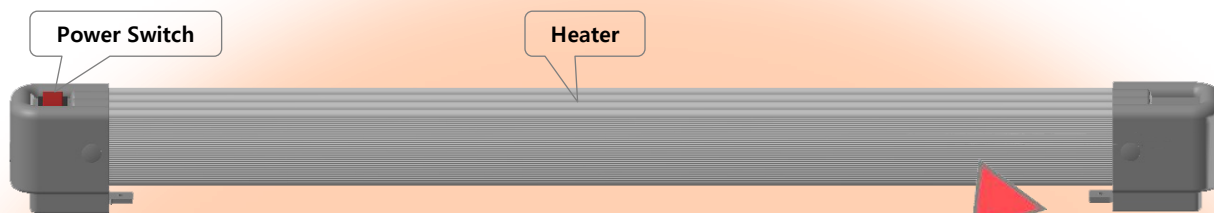

Easy to install on small to medium areas.

If it does not exceed the ideal constant temperature there is no danger for fire.
